SANCTUMSHIELD ACADEMY

Show who was trained, for which role, and when.

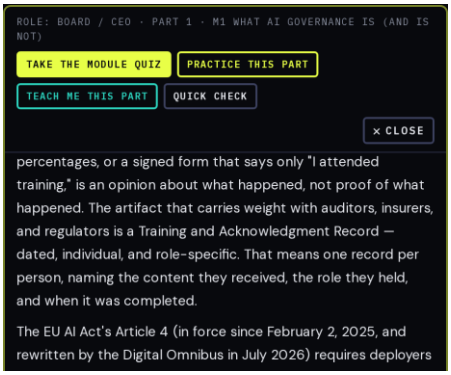

Role-based AI governance literacy. Assessed knowledge. Dated records anyone can verify.

5 role tracks board to frontline
20 modules including agentic AI
Scored role test 80% to pass, no AI grading
Verifiable record public link per person

The question you will be asked

Who was trained, for which role, and when? EU AI Act Article 4 has applied since February 2, 2025. As amended by Regulation (EU) 2026/1744, it requires providers and deployers to take measures to support the development of AI literacy among their staff, taking into account each person's knowledge, experience, training and the context in which AI is used. National authorities supervise it from August 2, 2026. Insurers, auditors and enterprise customers are asking a similar question.

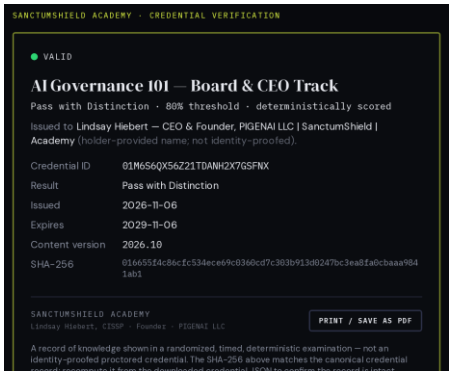

The duty sits with the organization. A video, an attendance certificate or a policy acknowledgment records that something happened. Dated, individual, role-specific training records show which measures were taken, for whom and when. That record is what the Academy produces.

Learn with the Academy Tutor
Ask by voice or text. Answers come from the course.

Practice with module quizzes
A quiz for every module, with an instant explanation.

Show it with a verifiable record
A dated Record of Completion anyone can check.

Five role tracks, the right depth for every seat

Role track	Scope and time	What it prepares the role to do
Board & CEO	**9 modules · 60–80 min**	Oversight, delegation, and the decisions leaders are asked to sign.
CISO / Security Leader	**20 modules · 5–6 hrs**	The full risk, threat and operating program, including agentic AI.
CTO / CIO / IT	**14 modules · 3–3.5 hrs**	Tools and MCP supply chain, agent identity, evals, gates and incident response.
Legal / Compliance	**13 modules · 3–3.5 hrs**	Obligations, frameworks (EU AI Act, Colorado SB 26-189, ISO 42001) and defensible records.
Employee Essentials	**7 modules · 30–40 min**	Safe use, verifying outputs, and knowing when to escalate.

Five Capacities in every track, at the depth the role needs: Recognition (can you tell you are using AI?), Boundary (what may it do in your hands?), Verification (can you check it before you act?), Escalation (who do you tell?), and Accountability (which person signs?).

For the business decision maker

- A dated, per-person record for the Article 4 question
- Depth by role, from the board to every employee
- Records an auditor, insurer or customer can check

For the technical decision maker

- Tracks for the CISO and for CTO, CIO and IT, including agentic AI and MCP
- Deterministic scoring with a public verification link
- Runs in the browser. Nothing to install or integrate

AI Governance 101: twenty modules, one curriculum

FOUNDATIONS · M1–M5

M1 What AI Governance Is (and Is Not)
M2 Due Care & Due Diligence
M3 Shadow AI & the Four-Layer Surface
M4 Why Now: Regulatory Clock
M5 Why Now: Threat Clock

FRAMEWORKS & ARTIFACTS · M6–M10

M6 Stakeholder Map & RACI
M7 The AIMS (ISO 42001 in Plain English)
M8 The Artifacts
M9 Framework Deep-Dive I (US)
M10 Framework Deep-Dive II (EU/Intl)

TOOLING & AGENTIC AI · M11–M15

M11 The Tooling Landscape & Tool/MCP Supply Chain
M12 Agentic AI Governance
M13 Agent Identity, Access & Delegation
M14 Agentic Threat Taxonomy
M15 Evals, Red-Teaming & Deployment Gates

OVERSIGHT & OPERATIONS · M16–M20

M16 Effective Human Oversight
M17 Agent Incident Response & Observability
M18 Operating Rhythm & 90-Day Plan
M19 Consequences, Scenarios & Capstone Tabletop
M20 From Blueprint to Ledger: Architecture to Governance

Course visual: from accountable human to attributable record

Course visual: agent threats, each mapped to its module

How it works

1. Choose
Pick a plan and the track for each seat. On Team plans, assign seats by email.

2. Learn
Read, ask the Academy Tutor by voice or text, and practice until it holds.

3. Show
Take the timed role test. A pass issues a dated Record of Completion anyone can verify.

The Record of Completion

Each track ends in a timed role test, scored deterministically. No AI grades it. **80% passes; 92% earns Pass with Distinction.** A pass issues a dated, individual, role-specific Record of Completion with a public verification URL and a SHA-256 content fingerprint, which a recipient can compute from the file to confirm it matches the record. Records are valid for three years and stay verifiable for five.

Said plainly: it is a record of knowledge shown by examination. It is not an identity-proofed, proctored credential, it is not issued by any authority, and it does not replace the company's own governance records, which the SanctumShield platform helps produce.

Plans: one curriculum on every plan

Plan	Seats and Tutor allowance	A good fit for
Individual	1 learner · 1,000 Tutor messages a month	One leader evaluating the course
Pro	1 learner · 2,500 Tutor messages a month	A lead who wants more Tutor time
Team (suggested start)	Up to 10 seats · 600 Tutor messages per seat a month	A first group across all five roles
Team Pro	Up to 10 seats · 1,500 Tutor messages per seat a month	Team, with more Tutor time for every seat

Month to month. Cancel anytime and keep every record earned. Reading, quizzes and role tests do not use Tutor messages. On Team plans, seats can be reassigned at any time and earned records stay valid. Current pricing: academy.sanctumshield.com/enroll.
